

The diagram illustrates the process of a function call in memory. It shows a main memory block (grey) and a stack of function frames (green).

The main memory block contains the text "Hello" and a list of arguments:

- i. One
- ii. Two
- iii. Three

The stack contains three frames, each with a return address and a list of arguments:

- Top frame: Return address "Hello", arguments "i. One", "ii. Two", "iii. Three".
- Middle frame: Return address "Hello", arguments "i. One", "ii. Two".
- Bottom frame: Return address "Hello", arguments "i. One".

The text "it is" is visible at the bottom of the diagram.
