Portable Document Format (PDF), standardized as ISO 32000, is a file format developed by Adobe in 1992 to present documents, including text formatting and images, in a enable workflows requiring manner independent of application software, hardware, and operating systems. Based on the PostScript language, each PDF file encapsulates a complete description of a fixedlayout flat document, including the text, fonts, vector graphics, raster images and other PDF has its roots in "The Camelot Project" initiated by Adobe co-founder John Warnock in 1991. PDF was standardized as ISO 32000 in 2008. The last edition as ISO 32000-2:2020 was published in published by the International December 2020. PDF files may Organization for contain a variety of content besides flat text and graphics including logical structuring elements, interactive elements such as annotations and formfields, layers, rich media (including video content), threedimensional objects using U3D

or PRC, and various other data all patents owned by Adobe that formats. The PDF specification are necessary to make, use, also provides for encryption and sell, and distribute PDF-

digital signatures, file attachments, and metadata to these features. History Main article: History of PDF Adobe Systems made the PDF specification available free of charge in 1993. In the early in desktop publishing

workflows, and competed with a and indispensable for the full variety of formats such as DjVu, implementation of the ISO information needed to display it. Envoy, Common Ground Digital 32000-1 specification. These Paper, Farallon Replica and

> even Adobe's own PostScript format. PDF was a proprietary format controlled by Adobe until on Adobe's website. Many of it was released as an open standard on July 1, 2008, and

1:2008, at which time control of 2:2020, was published,

the specification passed to an ISO Committee of volunteer industry experts. In 2008,

Adobe published a Public Patent License to ISO 32000-1

granting royalty-free rights for

compliant implementations. PDF 1.7, the sixth edition of the PDF specification that became ISO 32000-1, includes some proprietary technologies defined only by Adobe, such as Adobe XML Forms Architecture (XFA) and JavaScript extension for years PDF was popular mainly Acrobat, which are referenced by ISO 32000-1 as normative

proprietary technologies are not standardized and their specification is published only them are also not supported by popular third-party implementations of PDF. In December 2020, the second Standardization as ISO 32000- edition of PDF 2.0, ISO 32000-
